

Design Technology Yr9

Progress Indicator

No	Some	Good	Exceptional

Making

Midpoint Grade	Criteria
M9	Collate photographic evidence of the making progress and evaluate. Realising the design concept through exceptionally high levels of making/finishing skills applying very close tolerances.
M7-8	A high quality prototype that has the potential to be commercially viable. Use appropriate tools safely and independently with confidence and skill. Excellent evidence of quality control Make products that are reliable and robust and that fully meet the quality requirements given in the design proposal.
M5-6	Adapt methods of manufacturing when situations change and solve technical problems. Consider where CAD/CAM could be used to improve the prototype for its function or in the manufacture. Be able to explain and justify why changes have been made from originals idea.
M3-4	Adequate level of making/finishing skills that are mostly appropriate to the desired outcome with basic quality control present Select specialist tools and justify using technical language the processes used on the product. Organise my work so that I can carry out processes accurately and consistently.
M1-2	Review work as it develops and modify approaches to solve problems.

Midpoint grade comment	select and use the appropriate tools and equipment for making/joining.
------------------------	--

Making Book Polishing

1. Have you read through and acted on feedback given?	
2. Have you looked through your TATs to see how to achieve the next track point?	
3. Have you finished any incomplete work?	
4. Have you corrected any spelling (sp) mistakes?	
5. Have you made sure your work is presented well and is neat/tidy?
